LiftMaster® and Best Buy's Geek Squad®
ARE PARTNERING TOGETHER

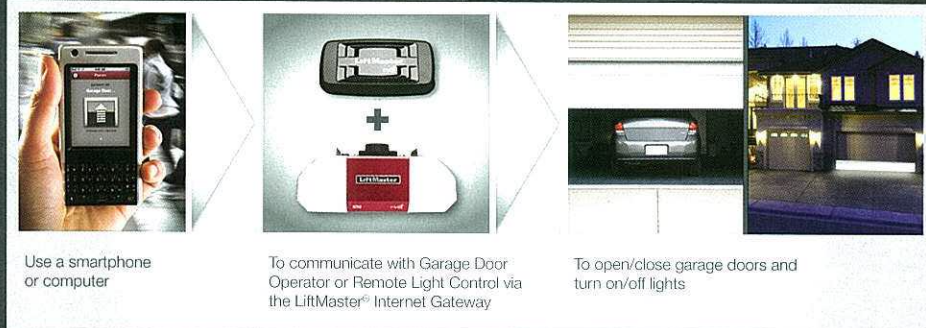

For Installation of the LiftMaster® Internet Gateway

LiftMaster

Monitor and Control Your Garage Door Opener or Gate from Anywhere in the World.

Need Help Connecting Your Garage Door Opener and Accessories to the Internet?

Use a smartphone or computer

To communicate with Garage Door Operator or Remote Light Control via the LiftMaster® Internet Gateway

To open/close garage doors and turn on/off lights

LiftMaster® garage door openers and gate operators are equipped with patented MyQ® technology. MyQ® utilizes the industry's first two-way communication system that allows you to connect to and control garage door openers, select gate operators and house lights from anywhere via an Internet-enabled smartphone or computer. So whether you are halfway around the world when you remember your garage door or gate is open, or your child forgot their key while you are at work – MyQ® can take care of it for you. Now that's peace of mind.

The key to this revolutionary MyQ® technology is the LiftMaster® Internet Gateway accessory. It plugs in to your existing Internet router and wirelessly connects to your garage door opener, gate operator or remote light control.

As your total garage access solution provider, we rely on Best Buy's Geek Squad® to install your LiftMaster® Internet Gateway and select light controls and connect your Garage Door Opener to your existing wired home Internet network.

Geek Squad® Installers are the Home Network Access Experts:

Your Geek Squad® representative will thoroughly go through the following steps to make sure your LiftMaster® Internet Gateway installation is seamless.

Preparation:

1. Perform a pre-installation site survey and review the scope of work
2. Verify that your home has a broadband modem and/or wired router with an open Ethernet port
3. Recommend additional solutions based on your needs and expectations

Setup:

4. Create an online account for you and register the LiftMaster® Internet Gateway
5. Add the garage door opener or MyQ® enabled lighting to the LiftMaster® Internet Gateway from <https://www.myliftmaster.com>
6. Download the proper app for your mobile device(s)
7. Demonstrate the system and its components

Standard Geek Squad® service does NOT include:

- Computer, network, router or modem repair/troubleshooting
- An existing network setup – a wired Internet connection – must be present at the time of the scheduled appointment
- New network or PC service setup is available at additional cost
- Repair/installation of a LiftMaster® garage door opener or remote control accessory is not included. Please go to LiftMaster.com to locate your nearest authorized LiftMaster® dealer for more information.
